

2023 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2023 URS Output Tables present findings from 58 states and U.S. territories. The U.S. Virgin Islands was omitted because they did not submit any data. Each output table provides summary information on the SMHA clients served in 2023: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2023, 8,253,780 clients received SMHA services from 58 states and U.S. territories/jurisdictions. This is an increase from 8,180,236 clients served by the SMHAs in 2022. There were 6,015,438 adults (or 23.0 per 1,000), 2,229,152 children (or 30.7 per 1,000) served. Age data was missing for 9,190 (0.1 percent) clients served.
- Among SMHA clients, there were 4,418,899 (53.5 percent) females served while there were 3,766,336 (45.6 percent) males served. In the majority of states (41), more females were served than males, and in the remaining states (17), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 22.5 percent, children ages 13-17 with 12.7 percent, and children ages 6-12 with 11.8 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.8 percent; Black or African American clients comprised the next largest group with 17.3 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (68.5 percent), while 15.2 percent were Hispanic.

Texas 2023 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	8,253,780	15.18	24.50	58
Community Utilization per 1,000 Population	8,003,047	15.09	23.75	58
State Hospital Utilization per 1,000 Population	114,039	0.61	0.34	54

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 44

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race. The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Ethnicity Not Available	-	-	972,719	16.9%	-	-	-	45

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age None
 Gender None
 Overall Populated by the BHSIS Project Office using TX's 2023 MH-CLD BCI dataset.

Table 6 State Notes:

State Psychiatric Hospital None
 Other Psychiatric Inpatient None
 Residential Treatment Centers None
 Community Mental Health Programs None
 Overall None

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

None

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

Populated by the BHSIS Project Office using TX's 2023 MH-CLD SHR dataset.

URS Table Number	General Notes
2C, 2D	HHSC is unable to provide this data and currently there are no plans to collect this data.
3, 14C	<p>Several factors may contribute to a decrease in consumers served in Other Psychiatric Inpatient settings. Such factors are, but not limited to, increase in community based mental health services, early intervention programs, crisis stabilization units, telehealth services and policy and system changes.</p> <p>Overall, the Residential Treatment Center (RTC) Project is receiving more referrals. Children’s Mental Health (CMH) provides extensive technical assistance to the Local Mental Health Authorities and Local Behavioral Health Authorities (LMHAs and LBHAs) on the referral process for the RTC Project. The RTC Project liaisons at the LMHAs and LBHAs are now more familiar with the referral process, and therefore, more comfortable facilitating the referrals for RTC Project services with families. Over the last Fiscal Year, the RTC Project also increased the daily rate which allowed RTC Project facilities to accept children with intensive needs because they had the resources to support them in their facility. The RTC Project also saw an increase in referrals from Department of Family and Protective Services (DFPS) Post Adopt.</p> <p>As the RTC Project continues to expand (onboarding new RTC placement providers and more outreach about services to various stakeholders), the CMH team hypothesizes that the number of consumers served will continue to trend upwards.</p>
6	<p>This increase is due to the RTC expansion which consists of several key factors such as, growing demand for MH services, population growth and increase in funding.</p> <p>Other Psychiatric Inpatient: This change is due to increased accuracy of the EHR at the local level thorough elimination of data duplication and over-reporting by LMHA’s.</p>
7A	<p>MHBG Expenditures: Projects that began in FY22 completed ramp up phases and expenditures increased in FY23. In addition, projects such as Coordinated Specialty Care saw increases in use and expansion to continue meeting set-aside requirements.</p> <p>Medicaid Expenditures: The HCBS-AMH Medicaid program has continued to serve more individuals and as an entitlement program the state has an obligation to provide Medicaid services for all eligible clients.</p> <p>EBP for ESMI Expenditures.: Texas has continued to support the 10% set-aside requirement with use of Covid-19 Relief Funds and ARP Funds. These expansions over the past three years continue to show increased expenditures as new teams are established and reach expected caseloads. Increases over time are expected given increased funding for Texas’ MHBG; however, the end of MHBG COVID-19 Relief and ARP funding could potentially lead to a decrease in expenditures.</p> <p>State Hospital Expenditures: The two cost drivers that contributed to the 2023 increased costs were: Salary Adjustments (pay raises and merits) and the State Hospitals experiencing a shortage in staff and high turnover which caused them to contract out their staffing needs.</p> <p>COVID-19 Relief Projects that started in FY22 continued to ramp up, resulting in higher expenditures in FY 2023. ARP projects that started in FY22 continued to ramp up which resulted in higher expenditures in FY 2023. In addition, many projects that started with COVID-19 Relief funds began to use ARP funding as well. This transition will continue in FY24 resulting in greater ARP expenses in the coming fiscal years.</p>
8	<p>MHBG Expenditures for Non-Direct Service Activities: The increase in expenditures is attributable to additional provider training and education to bolster opportunities for Texas’ mental health workforce.</p> <p>COVID-19 Relief fund projects focused on training saw higher expenditures after ramping up in FY22. The higher expenditures in non-direct services will directly correlate with the overall increase in COVID-19 Relief fund spending in FY23.</p> <p>Non-Direct service activities attributable to COVID-19 or ARP funds were all applied to the COVID-19 Relief funds.</p>
14A	<p>Mental health disparities within specific communities, such as Native Hawaiian and Other Pacific Islanders (NHOPI), can increase from a combination of historical, social, economic, and cultural factors. These factors are, but not limited to historical trauma. Socioeconomic factors, cultural stigma, healthcare disparities, social determinants of health, substance abuse and acculturation stress.</p> <p>Mental health disparities are complex and multifaceted, often resulting from a combination of various factors, including social, economic, cultural, and systemic issues. Different minority groups may also experience unique challenges that contribute to these disparities subsequently increasing the number of multi-race consumers with SMI/SED.</p>

URS Table Number	General Notes
15	<p>Crisis Residence: The increased ability to match to the TLETS system and increased capacity for crisis intervention in jails has led to increased engagement on the part of mental health providers across the state. Similar to the changes in Tables 3,14C – the increase in referrals allows for an increase in the number of children admitted into RTC Project facilities and current enrollment numbers would then be higher at the beginning and end of each fiscal year. Additionally, the rate increase and increase in RTC Project providers created more bed availability across a larger provider pool.</p> <p>During the COVID-19 pandemic, local jails and prisons released thousands of inmates early due to the health risks posed by the disease. Now, jails are reporting that the population has increased since.</p>
16A	Supported Employment Services: 98% of the difference is attributable to one provider due to staffing and capacity issues. We are continuing to provide TA and consulting with this provider to increase capacity of this program in the future
16B	Receiving Family Psychoeducation: there are currently no plans to collect this data.
17	<p>Crisis Stabilization Programs:</p> <p>Although no data was entered for age group 0-5, 6-12, 13-7 & 75+, these programs are 100% available for all ages including these. All three services on Table 17 are available to the entire state population and has been reported as 100% for all ages and services.</p>
19A, 19B	No survey for this data is currently in place and no plans to implement in the future at this time.
20B	Data show that only 76% of discharges were followed up by LMHAs within 7 days of discharge. Lack of follow-up has caused increase in readmittance to state hospitals.
