

2023 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2023 URS Output Tables present findings from 58 states and U.S. territories. The U.S. Virgin Islands was omitted because they did not submit any data. Each output table provides summary information on the SMHA clients served in 2023: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2023, 8,253,780 clients received SMHA services from 58 states and U.S. territories/jurisdictions. This is an increase from 8,180,236 clients served by the SMHAs in 2022. There were 6,015,438 adults (or 23.0 per 1,000), 2,229,152 children (or 30.7 per 1,000) served. Age data was missing for 9,190 (0.1 percent) clients served.
- Among SMHA clients, there were 4,418,899 (53.5 percent) females served while there were 3,766,336 (45.6 percent) males served. In the majority of states (41), more females were served than males, and in the remaining states (17), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 22.5 percent, children ages 13-17 with 12.7 percent, and children ages 6-12 with 11.8 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.8 percent; Black or African American clients comprised the next largest group with 17.3 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (68.5 percent), while 15.2 percent were Hispanic.

Utah 2023 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	8,253,780	17.86	24.50	58
Community Utilization per 1,000 Population	8,003,047	17.66	23.75	58

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 44

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race. The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2022-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served. The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Transgender, Gender Non-Conforming, Other gender, Some Other Race, as well as Age, Gender, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age None
 Gender None
 Overall Populated by the BHSIS Project Office using UT's 2023 MH-CLD BCI dataset.

Table 6 State Notes:

State Psychiatric Hospital None
 Other Psychiatric Inpatient None
 Residential Treatment Centers None
 Community Mental Health Programs None
 Overall None

 Overall None

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition of SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring Mental and Substance Use Disorders, FY 2023

Utah

Reporting Period: 7/1/2022 To: 6/30/2023

Adults and Children Who Meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	56.6%	70.9%	77.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	66.9%	69.3%	74.0%	57

Co-Occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring M/SUD	12.4%	27.1%	24.5%	56
Percent of Children served through the SMHA who had a co-occurring M/SUD	1.2%	6.9%	2.5%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	14.0%	26.8%	25.0%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	14.0%	6.9%	2.5%	54

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

The distinct count of clients submitted in MH BCI and SUD-TEDS. SED/SMI denominator is of the SED/SMI total population.

State Notes:

None

Ethnicity Not Available	121	7.2%	16,519	7.8%	3.5%	4.3%	43

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

Populated by the BHSIS Project Office using UT's 2023 MH-CLD BCI dataset.

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

Populated by the BHSIS Project Office using UT's 2023 MH-CLD SHR dataset.

Utah

URS Table Number	General Notes
2C, 2D	Utah does not collect sexual orientation data at this time.
3	Two urban areas saw independent growth in population and new residential treatment facilities have opened.
7A	<p>The COVID/ARPA funding has moved around funding sources. UT still meets necessary MOE requirements, but the areas in which particular funding is to be used have changed slightly. UT's systems have experienced a high amount of one-time funding and/or funding that lasts 2-3 years. This causes fluctuations in what is funded and what categories these are listed under. The large increase in spending of COVID/ARPA funds is due to delays in contracting when the funds were first awarded (always a good rationale). The state fund increase is due to the state investment (\$) in the crisis continuum.</p> <p>The increase in ESMI funding is primarily due to the addition of \$808,000 in COVID supplemental and ARPA funds.</p> <p>The increase in admin funding is due to an increase in admin dollars from SAMHSA grants and state funds of over \$2 million.</p> <p>The increase in crisis funding is primarily due to a large State investment of over \$38 million.</p>
7B	The increase is due to increasing support to CSC-FEP teams and to filling all the positions on the CSC-FEP team in Salt Lake County.
8	The decrease in COVID funds and increases in MHBG and ARPA funding are due to shifting infrastructure expenditures from one funding source to the sources that are available for longer periods of time.
11A	We experienced a race coding issue and did not have time to correct for 2023 reporting. Instructions appear to say it's optional. We will continue to do it in the future though.
12	The total number differences are not necessarily significant to UT at this time as there is variation in reporting of diagnosis type that; the state does not feel something is happening differently in Utah. The total numbers are not as significant as the percentage makes it appear.
16A	The other two elements in 16A are large percentage changes but total numbers are unimportantly low.
17	Call center age is unknown at times. However, our MCOT and Crisis data is known. I think this would be standard.
19A, 19B	Utah has not provided these tables in previous URS submissions.
