# Access to and Outcomes of Substance Use Disorder Treatment Services Provided to Adolescents and Young Adults

SAMHSA
Substance Abuse and Mental Health Services Administration

06.2025

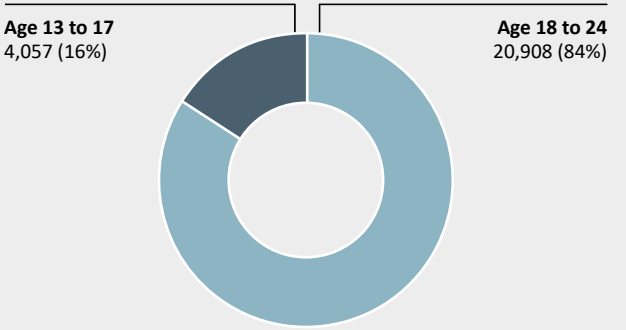
## Introduction

SAMHSA helps increase access to and improve outcomes of substance use disorder treatment for individuals and families across the nation. An important subgroup of people treated are adolescents and young adults. This profile presents data collected from January 21, 2023, through September 30, 2024, from several of SAMHSA's discretionary grant programs that have supported substance use disorder treatment services for adolescents (ages 13 to 17) and young adults (ages 18 to 24).*

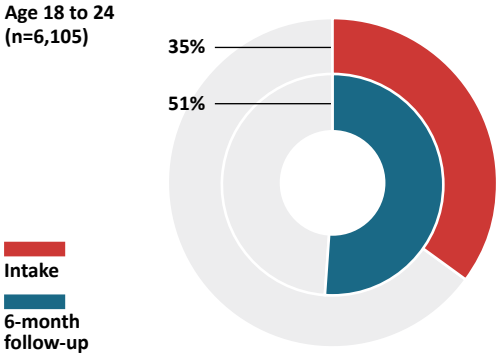
## Number of adolescents and young adults entering treatment services

**24,965**

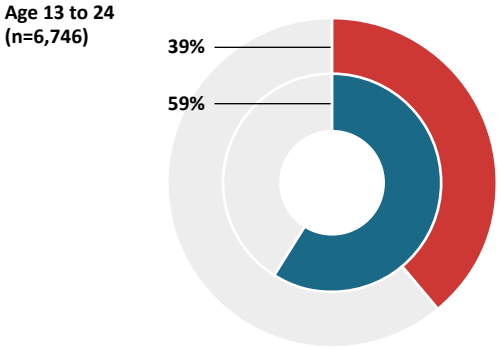
Number of clients ages 13 to 24 entering treatment services in FY 2023 and FY 2024



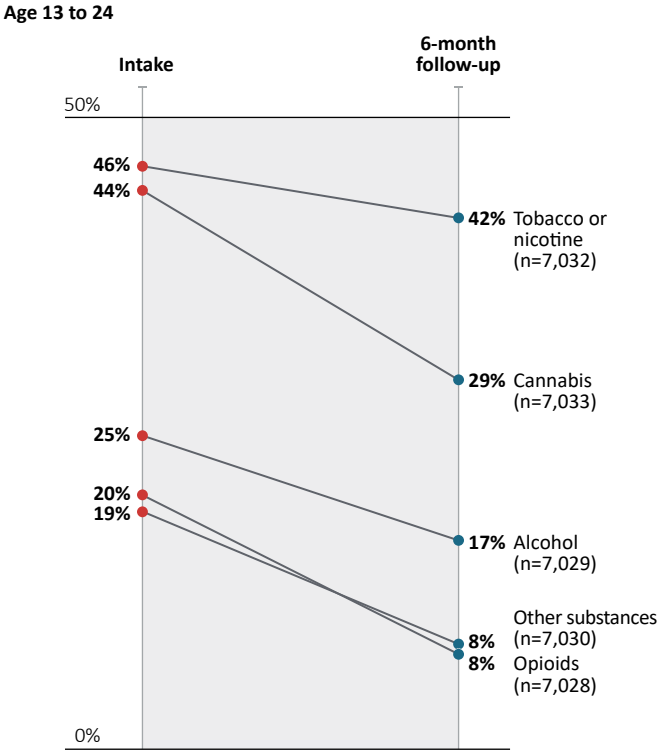
## Currently employed



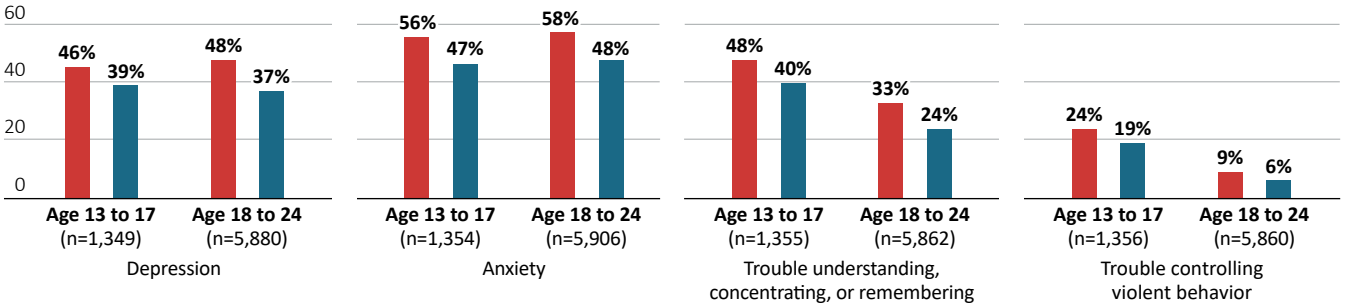
## Past 30-day abstinence



## Past 30-day drug use, by substance



## Past 30-day mental health problems



## Notes

*The programs included in this analysis are CORC, Adult and Family Treatment DC, GBHI, MAT-PDOA, MAI-High Risk Populations, ARP, PPW, PPW-PLT, PYO TREAT, SOR, TCE-HIV High Risk Populations, TCE-Special Projects, and YFTREE. Full names of the programs are listed in the accompanying database codebook.

- Outcome analyses include only clients who were in the program for at least 6 months by the end of FY 2024 and consented to a 6-month follow-up interview.
- Percent = percentage of clients in the age group meeting the outcomes; n = total number of clients included in the analysis
