2025 Uniform Reporting System Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 29 tables developed by SAMHSA in consultation with SMHAs. The 2025 URS Output Tables present findings from 59 states and U.S. territories/jurisdictions.

Each output table provides summary information on clients served by SMHAs in 2025, including sociodemographic characteristics, outcomes of care, utilization of selected evidence-based practices, client perceptions of care, Medicaid funding status, living situation, employment status, crisis response services, and readmissions to state psychiatric hospitals within 30 and 180 days. Key findings are highlighted below:

- In 2025, 7,883,203 clients received SMHA services across 59 states and U.S. territories/jurisdictions, a slight decrease from 7,945,185 clients served in 2024. Several states reported factors that contributed to lower reporting levels in 2025.

- A total of 5,741,738 adults (21.5 per 1,000) and 2,139,132 children (29.2 per 1,000) received services. Age data were missing for 2,333 clients (<0.1 percent).

- Among SMHA clients served, 4,121,599 (52.3 percent) were female, while 3,708,410 (47.0 percent) were male. In most states (34), more females than males were served; in the remaining 25 states, more males than females were served.

- The largest proportion of SMHA clients served were adults ages 25–44 (33.7 percent), followed by adults ages 45–64 (22.1 percent), children ages 6–12 (12.3 percent), and adolescents ages 13–17 (12.1 percent).

- More than half of SMHA clients served were White (56.2%), followed by Black or African American clients (18.1%). Race was missing for 11.5% of clients. Most clients were non-Hispanic (68.5%), while 15.0% were Hispanic.

Connecticut 2025 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	7,883,203	24.23	22.94	59
Community Utilization per 1,000 Population	7,661,571	23.85	22.29	59
State Hospital Utilization per 1,000 Population	120,089	0.38	0.35	54
Other Psychiatric Inpatient Utilization per 1,000 Population	413,348	0.06	1.38	43

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 47

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2024-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.
U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.
The penetration rates for Some Other Race and Not Available (for Age, Sex, Race, and Ethnicity) are not reported on this table because the U.S. Census data does not include these categories.
Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Tables 5A and 5B.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

State Notes:

Ethnicity Not Available	4,568	9.0%	937,498	17.1%	-	-	-	45

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2024-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.
U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.
The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.
Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age	None
Sex	None
Overall	Populated by the BHSIS Project Office using CT's 2025 MH-TEDS/MH-CLD dataset.

Table 6 State Notes:

State Psychiatric Hospital	CT uses two different data systems to collect admission, discharge, and LOS from 0-18 population and 18+ population. The state is unable to combine the LOS data for both of these populations to provide LOS data for the 18-20 group.
Other Psychiatric Inpatient	CT uses two different data systems to collect admission, discharge, and LOS from 0-18 population and 18+ population. The state is unable to combine the LOS data for both of these populations to provide LOS data for the 18-20 group.
Residential Treatment Centers	CT uses two different data systems to collect admission, discharge, and LOS from 0-18 population and 18+ population. The state is unable to combine the LOS data for both of these populations to provide LOS data for the 18-20 group.
Community Mental Health Programs	CT uses two different data systems to collect admission, discharge, and LOS from 0-18 population and 18+ population. The state is unable to combine the LOS data for both of these populations to provide LOS data for the 18-20 group.
Overall	None

APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient Settings, and Residential Treatment Centers, FY 2025

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

Populated by the BHSIS Project Office using CT's 2025 MH-TEDS/MH-CLD dataset.

State General Data Notes, FY 2025

Connecticut

URS Table Number	General Data Notes
3	The number of clients served in Other Psychiatric Inpatient settings increased in 2025 due to increased demand for these services.
5B	The minor differences between the totals in Table 5A and 5B are due to the fact that CT uses a live data set to populate these tables. The current differences between the two tables are due to the slight change in client data over time.
6	These year-over-year changes represent normal fluctuations in clients served.
7A, 7B, 7C, 8A	Year-to-year changes in expenditures from grant funds are normal and are based on the way payments are processed for various programs and services. From a fiscal perspective, year-over-year differences in expenditures are normal, especially for time limited grants. Expenses related to specific service categories (ESMI, etc.) have fluctuated due to the infusion of one-time grant funds (COVID-19 Relief, ARP, etc.). CT did not have any expenditures from COVID-19 Relief Funds (MHBG) during the reporting period.
8A, 8B	Other outpatient/ambulatory services for children and adults include outpatient services that are not tied to a specific evidence-based treatment model but use a variety of evidence-based practices and approaches within treatment. Other direct services for children and adults include residential services and residential case management services for individuals with SMI and SED.
12, 16A	This year, CT refined the list of diagnoses that are included in the state's SMI definition. As a result, this identified a smaller number of individuals served within the state's system that had SMI and co-occurring disorders in the 2025 reporting period.
16A	CT identified that for the 2024 reporting period we only reported the total numbers of consumers receiving ACT services that also had SMI. This year, we reported the total number of consumers receiving ACT services which was a larger number than 2024. Regarding the increase in children receiving MST, the program was reprocured in 2023 and new contracts were signed at the end of calendar year 2023. The agencies had to hire and train new staff, which decreased the numbers served in SFY 2024. Now that the program is fully staffed, numbers served increased in SFY 2025, back to historical levels. The total number of clients with SMI increased in 2025 due to changes made to the way that SMI is calculated for Table 16A, as well as minor changes CT made to the list of diagnoses used to identify SMI. The state expanded the list of diagnoses categorized as SMI for this table and included any diagnoses that were active throughout treatment. This increased the number of clients identified as SMI for this year’s reporting. CT feels this updated logic is a more accurate way to calculate SMI for this table. Regarding the difference between Table 16A and Table 14A, CT updated the logic and age calculation for adults with SMI. There are still some differences due to the fact data is pulled from the state's live dataset and Table 14A is populated using previously submitted MH-TEDS data so there will be some inevitable differences in client age and total numbers of SMI between these two tables.
