2025 Uniform Reporting System Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 29 tables developed by SAMHSA in consultation with SMHAs. The 2025 URS Output Tables present findings from 59 states and U.S. territories/jurisdictions.

Each output table provides summary information on clients served by SMHAs in 2025, including sociodemographic characteristics, outcomes of care, utilization of selected evidence-based practices, client perceptions of care, Medicaid funding status, living situation, employment status, crisis response services, and readmissions to state psychiatric hospitals within 30 and 180 days. Key findings are highlighted below:

- In 2025, 7,883,203 clients received SMHA services across 59 states and U.S. territories/jurisdictions, a slight decrease from 7,945,185 clients served in 2024. Several states reported factors that contributed to lower reporting levels in 2025.

- A total of 5,741,738 adults (21.5 per 1,000) and 2,139,132 children (29.2 per 1,000) received services. Age data were missing for 2,333 clients (<0.1 percent).

- Among SMHA clients served, 4,121,599 (52.3 percent) were female, while 3,708,410 (47.0 percent) were male. In most states (34), more females than males were served; in the remaining 25 states, more males than females were served.

- The largest proportion of SMHA clients served were adults ages 25–44 (33.7 percent), followed by adults ages 45–64 (22.1 percent), children ages 6–12 (12.3 percent), and adolescents ages 13–17 (12.1 percent).

- More than half of SMHA clients served were White (56.2%), followed by Black or African American clients (18.1%). Race was missing for 11.5% of clients. Most clients were non-Hispanic (68.5%), while 15.0% were Hispanic.

Louisiana 2025 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	7,883,203	8.90	22.94	59
Community Utilization per 1,000 Population	7,661,571	8.65	22.29	59
State Hospital Utilization per 1,000 Population	120,089	0.26	0.35	54

Notes:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 47

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2024-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.
The penetration rates for Some Other Race and Not Available (for Age, Sex, Race, and Ethnicity) are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2024-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age	None
Sex	None
Overall	None

Table 6 State Notes:

Ethnicity Not Available	19	3.1%	17,848	8.2%	2.1%	3.6%	43

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

None

Family Functional Therapy	35	4,550	71,937	708,213	0.8%	10.2%	Yes	6	20

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Tables 16A and 16B.

EBP N is the number of individuals reported that received this service; SMI N is the number of individuals with SMI that received this service.

U.S. averages, US SMI N, and US SED N data values are calculated uniquely for each data element based on only those states that reported clients served data for the EBP.

State Notes:

Forensics included in "non forensic" data? No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

Data for Calendar Year: January 1, 2024 - December 31, 2024.

State General Data Notes, FY 2025

Louisiana

URS Table Number	General Data Notes
2A, 2B	Clients reported in URS report are those served at Community Mental Health Programs, State Psychiatric Hospitals, and Residential Treatment Centers. Community Mental Health Programs for purposes of block grant reporting signify the Human Services Districts/ Authorities/ Local Governing Entities.
2A	Regarding the increase in total number of Asian persons served: Ten Local Government Entities (LGEs) in Louisiana collected data for mental health clients served at Community Mental Health Programs. One LGE was unable to submit data for the 2nd half of year in time for FY2024; this caused the decrease in total persons served count in FY2024. Some LGEs reported more Asian clients after transition from their old electronic health records to the new electronic health records. Regarding the decrease in total number of Race Not Available persons served, data quality for Race has been improved in FY2025.
4	Employed status only applied to consumers who are 18 or above at Community Mental Health Programs. Employed status data quality improved in FY2025. Some EHRs reduced their missing values; as a result, the 'Not Available' count decreased while counts in other categories increased.
6	Recently, the state hospital, ELMHS has been transferring clients to Ferriday and Bastrop. Additionally, the renovation of Evangeline has enabled the facility to increase both admissions and discharges in 2025.
7A	The increase in expenditures from FY24 to FY25 for the following categories: Total MHBG Expenditures, Other Funds Expenditures, State Funds Expenditures, Total State Funds Expenditures, State Hospital Expenditures, Total Ambulatory/Community Non-24-Hour Care Expenditures, Grand Total Expenditures, Total ARP Funds Expenditures, Total Other Psychiatric Inpatient Care, Crisis Services, and Bipartisan Safer Communities Funds is mainly due to Louisiana's ability to execute its contracts that were in process in the previous year. In addition, the higher percentage of MHBG spending is due to increased funding received through the FFY23 and FFY24 Awards, which are the main sources for SFY25 expenditures. The 100% decrease in Other Expenditures was due to the State's review of its expenditures and realigning its costs more appropriately with the Total State Funds Expenditures category. The 79% decrease in Total Administrative Expenditures is due primarily to the need for Louisiana to realign its state operations by moving funds designated for administrative costs to direct services. The decrease is also attributable to the expiration of the supplemental grants. The 86% decrease in Total COVID 19 Relief Funds Expenditures is primarily due to a planned phase down of the program as it was scheduled to end March 2025.
7B	The increase in expenditures from FY24 to FY25 for the following categories: Total MHBG Expenditures, Total ARP Funds (MHBG), Total BSCA Funds (MHBG), and Planning for CSC Practices is mainly due to Louisiana's ability to execute its contracts that were in process in the previous year. In addition, the higher percentage of MHBG spending is due to increased funding received through the FFY23 and FFY24 Awards, which are the main sources for SFY25 expenditures. MHBG funding shifted toward trainings and planning instead of Other. The 76% decrease in Total COVID 19 Relief Funds (MHBG) is primarily due to a planned phase down of the program as it was scheduled to end March 2025.
7C	The increase in expenditures from FY24 to FY25 for the following categories: Total MHBG Expenditures, Total Other Funds, Total ARP Funds (MHBG), Total BSCA Funds (MHBG), Call Centers, and Strategic Planning and Coordination is mainly due to Louisiana's ability to execute its contracts that were in process in the previous year. In FY25, a decrease in Medicaid funds and a decrease in the Crisis Stabilization services is due, in part, to OBH continuing to experience fewer Medicaid Crisis Stabilization expenditures due to the closure of a regional provider during FY24. The decrease in the Total COVID-19 Relief Funds (MHBG) is directly related to planned phase down of the program in preparation of the grant expiring. The decrease in Training and Technical Assistance is primarily the phase down of COVID-MHBG funding. And the decrease in State Fund accounts for a one-time initiative where State general funds were utilized to fund crisis services.
8A	The decrease in the Total COVID-19 funds Expenditures for Other Capacity Building/Systems Development Activities from FY24 to FY25 is directly related to Louisiana phasing down the program in anticipation of the grant expiring. The increase in Total ARP funds Expenditures for Other Capacity Building/Systems Development Activities from FY24 to FY25 is due to Louisiana's ability to execute its contracts that were in process in the previous year.

URS Table Number	General Data Notes
8B	Louisiana is currently reviewing its account structure to determine how best to implement these new requirements. At the time of the FFY26 Annual Block Grant submission, expenditures reported reflect costs grouped under previous reporting formats. Outpatient/ambulatory services includes both outpatient/ambulatory and other direct services for both adults and children populations. Also, crisis services were tracked by the set-aside requirement and is reported under Services for Adults for this reporting period. Non-direct services reflects the total Non-direct amount inclusive of COVID and ARP.
12, 14A, 14C, 15	One LGE was unable to submit data for the second half of year in time for FY2024, which caused a decrease in total number of persons served in FY2024. This also contributed to a decrease in the number of adults meeting the Federal definition of SMI in FY2025. This LGE submitted complete FY2025 data, and the number of missing SMI/SED values from this LGE also decreased a lot. This contributed to an increase in the SMI count in FY2025. In addition, missing SMI/SED values from some other LGEs also decreased. As a result, the improvements in SMI/SED data quality contributed a lot to the increase in percentage of adults meeting Federal definition of SMI in FY2025.
14A	Total number of consumers with SMI/SED in FY2025 is 20,720. Total number of consumers with SMI/SED in FY2024 was 16,834. This increase in total number of consumers with SMI/SED in FY2025 contributed to increase in total number of gender consumers with SMI/SED, Asian consumers with SMI/SED, African American consumers with SMI/SED, and Native Hawaiian/Other Pacific Islander with SMI/SED.
14C, 15	Regarding total number of consumers served in Community MH Programs: LA collected MH clients from community programs, state hospital and residential treatment centers, and most MH clients from community MH programs. Regarding Total number of consumers served in Residential Treatment Centers: Due to the low count in consumers served in Residential Treatment Centers, a small increase or decrease results in apparently high percentage change, with not enough statistical power to make any inference.
16A, 16B	A survey was conducted in order to collect fidelity monitoring information from the LGEs. The narrative responses reflect responses from the LGEs who implement these EBPs. The yes/no answers for use of SAMHSA toolkit & training reflect majority of the LGE responses. The pre-identified programs in the table do not reflect the entire service array of LGEs. Due to the low count in consumers receiving select services (e.g. Supported Employment services, ACT, Family Functional Therapy, Integrated Treatment for Co-occurring Disorders (M/SUD), and Illness Self-Management and Recovery services etc.), a small increase or decrease results in apparently high percentage change, with not enough statistical power to make any inference.
16A	Most of the Local Governing Entities (LGE) do not provide Supported Housing as Evidence-based practices for SMI and EBD priority population. After more in-depth and thorough research on this data, LA found one LGE reported one client for supported housing in FY2025.
16B	Integrated Dual Dx services only applied to the consumers who are 18 or above. Total consumers who were 18 or above with SMI in FY2025 was 16,170. Total consumers who were 18 or above with SMI in FY2024 was 12,676. This increase in number of adult consumers with SMI partially contributed to increase in total number of consumers receiving Integrated Dual Dx services and Medication Management services. Self-Management services only applied to the consumers who are 18 or above. Total consumers who were 18 or above with SMI in FY2025 was 16,170. Total consumers who were 18 or above with SMI in FY2024 was 12,676. This increase in number of adult consumers with SMI partially contributed to increase in total number of consumers receiving Illness Self-Management services. One LGE was unable to submit data for the 2nd half of year in time for FY2024 but submitted complete FY2025 data, this LGE did not report any consumers receiving illness Self-Management services in FY2024, but it reported about 2700 consumers receiving illness Self-Management services in FY2025, and several LGEs which are in transition from old EHRs to new EHRs also reported more consumers receiving illness Self-Management services in FY2025. These increases contributed to the overall rise in the total number of consumers receiving illness Self-Management services.
17	Crisis Stabilization Programs data includes LA Medicaid Crisis Stabilization, Community Brief Crisis Support, Behavioral Health Crisis Care, and Crisis Intervention services. For the FY2025 Table 17 Crisis Contact Centers item, LA expanded access to the full LA population in May 2025. Prior to that the Crisis Contact Centers service was limited to just the Medicaid Managed Care population. Since access for most of the SFY was limited to Medicaid Managed Care, the estimated percentages listed are based on the number of persons with Managed Care eligibility, not the entire LA population. It also applies to both mobile crisis and crisis stabilization services.

URS Table Number	General Data Notes
20A, 21	The low count in number of clients readmitted within 30 and 180 days during FY2025, resulting in apparently high percentage changes, do not indicate if this parameter needs improvement. In recent months, ELMHS has been transferring clients to Ferriday and Bastrop. Additionally, the renovation of Evangeline has enabled the facility to increase both admissions and discharges.
20A	Discharge records in FY2025 increased significantly compared to FY2024. This rise is largely due to the recent transfer of clients from ELMHS to Ferriday and Bastrop. In addition, the renovation of Evangeline has enabled the facility to expand its capacity, resulting in higher numbers of both admissions and discharges. So, the increased discharge volume also contributed to a decrease in the readmission percentage. The following actions are attributed to the decreases; discharge planning by treatment teams, improved communication with next providers of care, and standardized risk assessment process.
