While the rates of new youth alcohol users have declined since 2010, more than half of underage youth and young adults who use alcohol are binge drinking.

In 2018, 60% of the people aged 12-20 who reported alcohol use in the past month were also binge alcohol users.

**Binge Drinking** = 5 or more alcoholic drinks on the same occasion for males; 4 or more alcoholic drinks on the same occasion for females.
