Dear Administrator Hyde,

I want to let you know how important it is my family and to me that the privacy protections for alcohol and drug abuse patient records be maintained. I in recovery from addiction and I also have a criminal record. I do take responsibility for the actions I took that resulted in my addiction treatment and criminal record, I do not want my addiction treatment record to become a lifelong haunting.

People like me already have enough of the odds stacked against us. I do not want the risk of losing my kids, or face the loss of a job or my housing all due to someone finding out that I've been treated for addiction.

Sincerely

Dear Administrator Hyde,

It is my pleasure to write you this letter today. Thank you for all you do into the confidentiality act of keeping my drug and alcohol past events confidential in all the deterrents that society places on those such as myself. I have been a bad man even though I've been a Navy man and great father. I have been a parasite on society and an abandonment to my wife otherwise. I want to change that and give back to as I am finally clean. Thank you

Sincerely

Dear Administrator Hyde,

It is my honor in writing you now as well as those at Richmonds Regional Jail. I don't want to sound victimized but I don't want to say I had it easy either. I put forth all responsibility for my past downfalls and neglectedness as a person in this world, a fatherless dad, an addicted felon and leach on society.

However I am changing. Please give a shot by protecting my addiction records.

Dear Administrator Hyde,

I have been an abusive father and child abandoner in my life. Today I write and see my grown son every week as God has seen fit. But it was not God's grace alone, it was my free will to get clean and into treatment. In two weeks I will leave Richmond's Regional Jail as a free man. Please help protect my addiction rights so that I may now give back to society and repair my manhood as an indebted brother to the human race.

I think in this day and age with all of the technological advances that software companies can figure out how to keep that information available for those who must see it & unavailable to those who don't need to see it.

The threat to me & people like me is too great to risk doing away with these essential privacy protections. People like me already have enough of the odds stacked against us. I do not want to risk or face the loss of a job or my hosing all due to someone finding out that I had been treated for addiction. I don't want my medical records to be used against me just because I did the right thing & sought to get the help for my addiction.

Administrator Hyde, I hope you will do all you can to protect the privacy of my addiction records.

Sincerely,

Dear Ms. Hyde,

I am a recovering addict with a criminal records. I do not believe that my treatment information should be made public. I think this is a very private and sensitive area. The old saying goes "its hard to unring the bell". I think that people who are trusted with this situation should think long and hard. About.

Once you give something up its hard to take back.
