Products For Subverting Drug Tests

By: Anastasia Donovan
Intern, Division of Workplace Programs,
and assistance from CDR Sean Belouin and Ron Flegel

Disclosure

- The presenter DOES NOT have an interest in selling a technology, program, product, and/or services.
- Anastasia Donovan has nothing to disclose with regard to commercial relationships.
- The content of this presentation does not relate to any product of a commercial interest. Therefore, there are no relevant financial relationships to disclose.

Background/Mission of DWP

- “The Federal Drug-Free Workplace Programs, as mandated by Executive Order 12564 and Public Law 100-71, is a comprehensive program to address illicit drug use by federal employees, certification of Executive Branch agency Drug-Free Workplace Plans, and identification of safety-sensitive positions subject to random drug testing.”

<http://beta.samhsa.gov/workplace/workplace-programs>

- “The use of illegal drugs, on or off duty, by Federal employees impairs the efficiency of Federal departments and agencies, undermines public confidence in them, and makes it more difficult for other employees who do not use illegal drugs to perform their jobs effectively.”

-Executive Order 12564

Learning Objectives

- Show the abundance of subversion products available.
- Show the volume of websites available that sell these products.
- This is an issue that should be acknowledged for its significance in relation to workplace drug testing.

In 2013...

- 6,320,000 regulated drug tests completed.
 - Of those, 123,598 were found to be positive, adulterated, invalid, or substituted – increase from 2009 which had 88,431.
 - Of the 123,598:
 - 5,191 were substituted.
 - 19,034 were invalid.
 - 2,471 were adulterated.

SALIVA DRUG TEST - DETOX PRODUCTS

Home /

Pass Saliva Drug Test

The **Saliva (Oral Fluid) Drug Test** is used today very often for the drug test. Many people choose a product as alternative to the expensive and inconvenient urine test. In difference from the urine test saliva test can used at any time. Basically the saliva drug test is used for detection nicotine and other substances in a mouth. Therefore it is very important to have detox product for **pass saliva drug test**. It's very effective. Do not worry, after use of detox products, they will instantly negate any toxins in a mouth.

Detection in saliva tests begins immediately upon use:
Marijuana and Hashish (THC): 1 hour after ingestion, for up to 24 hours
Cocaine (including crack): From time of ingestion for 48 to 72 hours
Opiates: From time of ingestion for 48 to 72 hours
Methamphetamine and Ecstasy (MDMA, "Crank," "Ice"): From time of ingestion for 48 to 72 hours
BZD: From time of ingestion for 48 to 72 hours

Description Shipping Specs Reviews

Note: It is highly recommended that you get the Aloe Rid and use that as your everyday shampoo. Ultra Clean Shampoo and Conditioner Internal Hair Purifying Treatment Removes Medications, Chemical Buildup and Other Impurities From Within the Hair Shaft.

- #1 Shampoo: Removes External Barriers to Expose the Inner Hair
- #2 Purifier: Penetrates Deep Within the Hairshaft to Dissolve and Remove Impurities
- #3 Conditioner: Controls Tangles, Adds Sheen and Improves Manageability

The ONLY complete deep cleaning shampoo with purifying treatments and conditioner. SHAMPOO away external barriers such as hair spray, styling and finishing products, and everyday buildup to expose the inner hair. PURIFY by penetrating the hairshaft's inner structure to release, dissolve, and remove the chemicals and medications bonded within the hair. Leave your hair pure and clean, free of all unwanted contaminants and impurities. CONDITION hair to control tangles, add sheen, and improve manageability. Ultra Clean Shampoo and Purifier contains Aloe Vera to help condition both the hair and scalp while the penetrating cleansing agents remove impurities. The Aloe based conditioner will leave your hair tangle free and full of body. To be used ONLY on the day you wish your hair to be clean and free of unwanted impurities

Is 'Stealth 51' still out there??

18

- Nothing was found conclusively on the Internet for the adulterant product called 'Stealth 51', but there still remains evidence the product or similar products still are being used.

Stealth51 is a product of
Stealth Laboratories, Inc.

Contact us at the following:

Stealth Laboratories, Inc.
P.O. Box 5479
Chubbuck, ID 83202
(208) 478-2443

www.stealthlaboratories.com

Stealth Laboratories, Inc. does not advocate or condone cheating on drug tests or trying to dishonestly defeat urine testing and screening.

Our product is not to be used for lawfully administered drug tests.

There is no LEGAL ADVICE in this brochure. Stealth Laboratories, Inc. is not RESPONSIBLE FOR INDIVIDUAL(S) who may use the following product to pass a drug test even though the individual(s) may have consumed an illegal substance(s).

Stealth 51 Urine Additive

- A New Revolutionary Urine Additive

Instructions For Using Stealth51
Only use one packet or micro-vial per test. (DO NOT EAT!)
Always store Stealth51 in its own packages away from moisture.

1. First, holding wallet size packet, rub index finger and thumb together, twisting the package apart, causing seal to separate and it to open wide. Shake contents into cup before you urinate. Stealth51 dissolves faster this way but can be added at anytime.
2. For Micro-Vials, flip open lid and dump contents into urine cup.
3. Second, the mixture will take 10 or 15 seconds to dissolve. Swift the container slowly until Stealth51 is completely dissolved in the urine. (Don't panic, plenty of time, if necessary, use finger to stir the mixture, wash hands afterwards.)
4. Stealth51 does not cause urine to fluoresce or discolor.
5. Stealth51 does not contain nitrates or chromium.
6. Stealth51 was not developed for drug abusers. It is a defense against laboratory errors, falsely positive over-the-counter medications, and simply to assure the results you want - NEGATIVE.
7. Caution: Stealth51 is not to be used with the provided test strip. It is designed for a professional EMIT/GCMS drug screening. Stealth51 interferes with the specific antibody reaction that the THC test strip uses as an initial drug screen. The free THC strip is included as a self test only (a peace of mind if your clean).
8. Information is available on our WEBSITE: stealthlaboratories.com it offers information about Stealth51, our guarantees, and different types of information about drug testing. Our site is continually updated with responses from our actual Stealth51 customers and current FAQ's-frequently asked questions.

**WARNING: AVOID CONTACT WITH SKIN AND EYES;
DO NOT CONSUME.—DO NOT INHALE.
KEEP OUT OF REACH OF CHILDREN**

The Ten Commandments of Drug Testing

1. NEVER, DO NOT, DON'T give your first urine of the day (lots and lots of water, coffee, pop, etc.) Take your time. Urinate the proper amount. Try not to give more or less urine than the specimen needs. If possible, dilute your urine with water. Any dilution will greatly help. (Remember that the bladder police check for appropriate urine temperatures (around 98 degrees), creatinine levels, and specific gravity.)
2. Consume lots of fluids. The day before, the night before, and the morning before your test. Just keep drinking lots of fluids. (And no cranberry juice or vinegar water the day of or before, your test drinking spring water or mineral water is best because it is full of minerals). Also, it is important to consume a few glasses of water or coffee before your urinate. (at 8:00am use and/or Golden Seal root for a week before your test. One or two tablets a day, as recommended. Remember that roots naturally cleanse the system and increase the amount of times that you will need to pee-so drink lots of water while taking them!)
3. Day CREATINE tablets. Start eating the recommended amount a couple of days before your urine test. Consuming lots of fluids with the CREATINE is highly recommended. Also, eat a lot of meat. Meat also increases the CREATINE levels in the urine.
4. Day some activated charcoal capsules. Charcoal ads the body in excreting toxins. BE CAREFUL! Charcoal can prevent medications from being 100% effective.
5. Exercise a lot, profusely, sweating an activity in which you are continuously sweating. Eat fatty foods a day or two before the test. Fatty foods help trap THC molecules because THC is fat-soluble and slowly released.
6. Carbohydrate drinks aid in reducing THC levels from urine. They do not eliminate 100% of metabolites.
7. Know the THC urine limits. Understand that the EMIT urine screening test cut off level is 50 parts per billion. The legal cut off for GC/MS is 10 parts per billion (some companies set their own limits). Refer to www.stealthlaboratories.com for more exact cutoff information.
8. Take a multi-vitamin before the test. Daily Vitamins help to populate diluted (from excessive consumption of coffee, water, or pop before the screening) urine with vitamins and minerals.
9. Relax. Don't be nervous. Never admit that you have ever taken drugs. If you test positive, do not defend yourself in any of their questions and answers. They will treat you like a criminal in spite the fact that a high percentage of people test false positive each and every day.
10. Don't use obvious urine additives that glow (fluorescent orange colors). Products that make your urine look suspicious are easy for the lab techs to detect, especially additives with chromium. Be smart about your test. Check into the new drug testing developments. Many companies that test urine samples like the products that they detect in their analysis in order to promote the successfulness of their screening techniques. Also, check our Frequently Asked Questions and Consumer Responses for insight into bogus products and current laboratory testing techniques. Find out about all of the different products the testing industry is targeting, and read comments from people themselves about products with which they have received a positive. Use Stealth51, it works, and we assure you that it is continuously being advanced to address the newest urine testing technologies.
