New York Times – NYtimes.com
Prescription Opioids and Heroin: Public Health Challenge

In 2015, 2 million people had a pain reliever use disorder and nearly 600,000 had a heroin use disorder. The national data on overdose deaths are startling: in 2015, there were 33,091 (2014 - 28,647) overdose deaths involving prescription opioid medications and/or heroin.

That is equivalent to an average of one death every 16 minutes.
Fentanyl Deaths
Past Month Nonmedical Use of Pain Relievers among People Aged 12 or Older, by Age Group: 2002-2014

+ Difference between this estimate and the 2014 estimate is statistically significant at the .05 level.
Numbers of Past Year Initiates of Selected Substances among People Aged 12 or Older: 2014

- Marijuana: 2,568,000 (2.6 Million)
- Pain Relievers: 1,425,000 (1.4 Million)
- Tranquilizers: 1,133,000 (1.1 Million)
- Cocaine: 766,000
- Stimulants: 690,000
- Ecstasy: 676,000
- LSD: 586,000
- Inhalants: 512,000
- Heroin: 212,000
- Methamphetamine: 183,000
- Sedatives: 173,000
- Alcohol: 4,655,000 (4.7 Million)
- Cigarettes: 2,164,000 (2.2 Million)
- Smokeless Tobacco: 1,016,000 (1.0 Million)
Numbers of People Aged 12 or Older (in Thousands) Who Initiated Prescription Drug Misuse in the Past Year, by Age Group: 2015

- **Pain Relievers**: 2,126
  - 12 to 17: 1,120
  - 18 to 25: 370
  - 26 or Older: 636
- **Tranquilizers**: 1,437
  - 12 to 17: 540
  - 18 to 25: 420
  - 26 or Older: 477
- **Stimulants**: 1,260
  - 12 to 17: 400
  - 18 to 25: 430
  - 26 or Older: 430
- **Sedatives**: 425
  - 12 to 17: 70
  - 18 to 25: 80
  - 26 or Older: 275
Perceived Great Risk from Substance Use among People Aged 12 or Older: 2014

- Smoke Marijuana Once a Month: 26.5%
- Smoke Marijuana Once or Twice a Week: 34.3%
- Use Cocaine Once a Month: 68.6%
- Use Cocaine Once or Twice a Week: 86.3%
- Try Heroin Once or Twice: 83.1%
- Use Heroin Once or Twice a Week: 93.3%
- Try LSD Once or Twice: 68.0%
- Use LSD Once or Twice a Week: 83.9%
- Have 5+ Drinks of Alcohol Once or Twice a Week: 40.3%
- Have 4 or 5 Drinks of Alcohol Nearly Every Day: 66.1%
- Smoke One or More Packs of Cigarettes Per Day: 71.2%
Source Where Pain Relievers Were Obtained for Most Recent Nonmedical Use among Past Year Users Aged 12 or Older: 2012-2013

Note: The percentages do not add to 100% due to rounding.

1The Other category includes the sources “Wrote Fake Prescription,” “Stole from Doctor’s Office/Clinic/Hospital/Pharmacy,” and “Some Other Way.”
Source Where Pain Relievers Were Obtained for Most Recent Misuse among People Aged 12 or Older Who Misused Prescription Pain Relievers in the Past Year: Percentages, 2015

- Prescription from One Doctor: 34.0%
- Prescriptions from More Than One Doctor: 1.7%
- Stole from Doctor’s Office, Clinic, Hospital, or Pharmacy: 0.7%
- Given by, Bought from, or Took from a Friend or Relative: 53.7%
- From Friend or Relative for Free: 40.5%
- Bought from Friend or Relative: 9.4%
- Took from Friend or Relative without Asking: 3.8%
- Got through Prescription(s) or Stole from a Health Care Provider: 36.4%
- Some Other Way: 4.9%
- Bought from Drug Dealer or Other Stranger: 4.9%

12.5 Million People Aged 12 or Older Who Misused Pain Relievers in the Past Year
Four Pillars:
1. Education
2. Tracking and Monitoring
3. Proper Medication Disposal
4. Enforcement
HHS Strategy to Address Opioid Epidemic

1. Improve prescriber practices.
2. Increase naloxone use.
3. Expand MAT access.
2016 Surgeon General’s Report

FACING ADDICTION IN AMERICA

The Surgeon General’s Report on Alcohol, Drugs, and Health

U.S. Department of Health & Human Services
Since 1999, there has been a 300% increase in the sales of opioid prescriptions – without an overall change in reported pain.

- State Targeted Response to the Opioid Crisis Grants (new)
Safe and Effective Opioid Prescribing for Chronic Pain

Excessive or inappropriate use of opiates in the treatment of pain is a major national problem in the delivery of healthcare. Opioids are both underprescribed and overprescribed. Prescribing clinicians need training in effective communication skills as well as an understanding of when and how to prescribe opioids.

In addition to the specialists who frequently prescribe opioids (pain specialists, orthopedists, rheumatologists), primary care clinicians have increasingly taken on the burden of managing pain effectively. Safe and Effective Opioid Prescribing for Chronic Pain offers clinicians necessary education in how to work with their patients who are living with chronic pain – how to define chronic pain, how to manage its treatment, the tools available to assess pain and the risk involved in prescribing opioids, and how to discontinue treatment if necessary.
Providers Clinical Support System for Opioid Therapies (PCSS – O)

PCSS-O is a national training and mentoring project developed in response to the prescription opioid overdose epidemic. The consortium of major stakeholders and constituency groups with interests in safe and effective use of opioid medications offers extensive experience in the treatment of substance use disorders and specifically, opioid use disorder treatment, as well as the interface of pain and opioid use disorder. PCSS-O makes available no cost CME programs on the safe and effective use of opioids for treatment of chronic pain and safe and effective treatment of opioid use disorder.
Prescription Drug Monitoring Programs (PDMPs)

- Many states established PDMPs to reduce prescription drug abuse and diversion.
  - Statewide electronic databases:
    - Collect prescription records for all outpatient controlled substance prescriptions dispensed in the state
    - Distribute patient health information from the database to individuals authorized under state law.
Opioid Overdose Prevention Toolkit
Strategic Prevention Framework for Prescription Drugs (SPF-Rx)

- Raise public awareness about dangers of sharing medications
- Work with pharmaceutical and medical communities to raise awareness on risks of overprescribing
- Develop capacity and expertise in use of data from state prescription drug monitoring programs (PDMPs) to identify communities by geography and high-risk populations
- Eligibility is limited to states and tribal entities that have completed a Strategic Prevention Framework State Incentive Grant (SPF SIG), and have a state-run PDMP
Grants to Prevent Prescription Drug/Opioid Overdose-Related Deaths (PDO)

- Help states purchase naloxone not otherwise covered
- Equip first responders in high-risk communities
- Support education on use of naloxone and other overdose death prevention strategies
- Cover expenses incurred from dissemination efforts
- Recipients of the Substance Abuse Prevention and Treatment Block Grant (SABG) are eligible to apply.
State Targeted Response to the Opioid Crisis Grants Short Title: Opioid STR

- CSAT/CSAP Grant
- The program aims to address the opioid crisis by increasing access to treatment, reducing unmet treatment need, and reducing opioid overdose related deaths through the provision of prevention, treatment and recovery activities for opioid use disorder (OUD) (including prescription opioids as well as illicit drugs such as heroin).
- Awarded to states and territories via formula based on unmet need for opioid use disorder treatment and drug poisoning deaths.
- Up to 59 awards
- Deadline: February 17, 2017
Surgeon General’s Report on Alcohol, Drugs, and Health

Jinhee Lee, PharmD
Managing Editor

February 1, 2017
Center for Substance Abuse Prevention
National Advisory Council Meeting
Rockville, MD
Contents of the Report

Chapter 1: Introduction and Overview of the Report
Chapter 2: The Neurobiology of Substance Use, Misuse, and Addiction
Chapter 3: Prevention Programs and Policies
Chapter 4: Early Intervention, Treatment, and Management of Substance Use Disorders
Chapter 5: Recovery: The Many Paths to Wellness
Chapter 6: Health Care Systems and Substance Use Disorders
Chapter 7: Vision for the Future: A Public Health Approach
Rationale for the Report

• Drug and alcohol misuse and disorders are public health challenges that affect millions and place enormous burdens on society
• The U.S. has a serious substance misuse problem and is facing an unprecedented opioid epidemic
• Most Americans know someone with a substance use disorder, and many know someone who has lost or nearly lost a family member or friend to addiction
• The health care system has historically treated substance misuse and disorders as moral failings rather than chronic diseases
Use of consistent language and avoidance of certain terms will help change society's attitudes and biases about substance misuse and substance use disorders, reduce discriminatory practices, and improve the way we address substance use in the U.S.

- **Use** – Any use of any substance
- **Misuse** – Use that can harm self or others
- **Substance Use Disorder** – Medical illness, or chronic brain disease, caused by repeated misuse
Scope of the Issue

Among U.S. population aged 12 or older:

- **Over 66 million** reported binge drinking*
- **Over 47 million** used an illicit or non-prescribed drug
- **Almost 21 million** met criteria for a substance use disorder

* Binge drinking = drinking 5 or more drinks on one occasion for men and 4 or more drinks for women
Cost of Substance Misuse and Substance Use Disorders

Cost comparison to U.S. each year:

DIABETES
$245 BILLION

$442 BILLION

$193 BILLION

SUBSTANCE MISUSE & SUBSTANCE USE DISORDERS
$249 BILLION

#FacingAddiction
There are Reasons for Hope and Optimism

• The public is demanding prevention and treatment for substance misuse and related harms, not incarceration

• Research provides understanding and evidence on effectiveness of:
  – Prevention policies and community-based programs
  – New medications and behavioral therapies
  – A chronic care model of treatment and recovery

• Recent policies offer new opportunities:
  – Expanded access to prevention, treatment, and recovery
  – Integration with mainstream health care
Premise of the Report

- We can reduce substance misuse and addiction: Prevention works, treatment is effective, recovery is possible for everyone.
- There is a clear precedent—America has already adopted a science-based, public health approach to reduce another serious substance use problem:
The Neurobiology of Substance Use, Misuse, and Addiction

• Addiction is a chronic brain disease with potential for recurrence and recovery
• Describes the three main circuits in the brain involved in addiction, and how substance use can “hijack” the normal function of these circuits
• Understanding this transformation in the brain is critical to understanding why addiction is a health condition, not a moral failing or character flaw
Prevention Programs and Policies

• Describes a range of programs focused on preventing substance misuse including universal prevention programs that target the whole community as well as programs that are tailored to high-risk populations

• Also describes population-level evidence-based policies that are effective for reducing underage drinking, drinking and driving, spread of infectious disease, and other consequences of alcohol and drug misuse
Early Intervention, Treatment, and Management of Substance Use Disorders

- Describes the scientifically-proven clinical activities that are used to identify people who have a substance use disorder and engage them in treatment
- Also describes the range of medications and behavioral treatments that can help people successfully address their substance use disorder
Recovery: The Many Paths to Wellness

- Describes the construct of recovery as well as the number of people in recovery
- Describes the growing array of effective services and systems that provide recovery support and the many pathways that make recovery possible, including treatment, recovery support services, and/or mutual aid
Health Care Systems and Substance Use Disorders

• Explains why integrating general health care and substance use services can result in better outcomes
• Describes policies and activities underway to achieve that goal
• Discusses recent legislation that requires healthcare plans to offer substance use disorder services equitably with other health conditions
• Innovative delivery system reforms and models of care coordination are also discussed, as well as the different financing systems that cover substance use disorder services
Vision for the Future: A Public Health Approach
Five general findings and topline messages

1) Both substance misuse and substance use disorders harm the health and well-being of individuals and communities. Addressing them requires implementation of effective strategies.

2) Highly effective community-based prevention programs and policies exist and should be widely implemented.

3) Full integration of the continuum of services for substance use disorders with the rest of health care could significantly improve the quality, effectiveness, and safety of all health care.
Vision for the Future: A Public Health Approach
Five general findings and topline messages

4) Coordination and implementation of recent health reform and parity laws will help ensure increased access to services for people with substance use disorders.

5) A large body of research has clarified the biological, psychological, and social underpinnings of substance misuse and related disorders and described effective prevention, treatment, and recovery support services. Future research is needed to guide the new public health approach to substance misuse and substance use disorders.
Recommendations for Stakeholders

Report calls on various stakeholder groups to help change the culture, attitudes, and practices around substance use:

– Individuals and families
– Educators and academic institutions
– Health care professionals and professional associations
– Health care systems
– Communities
– Private sector: Industry and commerce
– Federal, state, local, and tribal governments
– Researchers
Final Chapter: In Summary

Everyone has a role to play in addressing substance misuse and substance use disorders and in changing the conversation around substance use, to improve the health, safety, and well-being of individuals and communities across our nation.
Next Steps: What You Can Do

• **Translate the Science into Public Understanding** – Traditional and social media to inform the public, particularly parents and community leaders

• **Incorporate the Science into Health Care** – Expand training of health care professionals, improve availability, access, and quality of services in all health settings

• **Modernize Policies** – Assure broad access to prevention, treatment, and recovery services

Information Update

CURES Act

Brian Altman, JD, Acting Director
Division of Policy Innovation, SAMHSA

CSAP National Advisory Council
February 1, 2017
Rockville, Maryland
The Mental Health Reform sections of the Cures Act resulted from two separate bills:

- **H.R 2646** – Rep. Tim Murphy (R-PA), a child psychologist and chair of the House Energy and Commerce Subcommittee on Oversight and Investigations, originally introduced a version of the bill in the 113th Congress, and made it his primary legislative priority in the 113th and 114th Congresses. H.R. 2646 passed the House in July 2016 after substantial changes were made from the originally introduced bill which was highly controversial.

- **S. 2680** – Sen. Lamar Alexander (R-TN), Chairman of the Senate Health, Education, Labor, and Pensions (HELP) Committee, introduced this bill as the Committee’s compromise version of legislation of the same title originally introduced by Sen. Bill Cassidy, M.D. (R-LA) and Sen. Chris Murphy (D-CT). S. 2680 advanced out of the Senate HELP Committee in March 2016.

The Opioid Funding sections of the Cures Act derive from President Obama’s FY17 Budget Proposal for $1.1 billion over two years in mandatory funding to address the nation’s opioid epidemic.
What is the 21st Century Cures Act?

- H.R. 34, the 21st Century Cures Act (Cures Act), was enacted on December 13, 2016.

- The Cures Act includes provisions that impact SAMHSA and relate to the agency’s work across the continuum of prevention, treatment and recovery support for individuals with, and at risk for, mental illness and substance use disorders.

- Through Section 1003, SAMHSA’s efforts to address the opioid epidemic will be greatly enhanced through the Account for the State Response to the Opioid Abuse Crisis.

- Through provisions in the Helping Families in Crisis Act portion of the statute, SAMHSA is reauthorized as an agency.
Key Issues for CSAP in the 21st Century Cures Act

• The Opioid STR Grant provision authorizes $500 million for each of FY17 and FY18 for HHS Secretary to provide grants to states to supplement opioid abuse prevention and treatment activities.

• Add the Director of the National Institute on Alcohol Abuse and Alcoholism to the CSAP NAC as an ex officio member.

• Ensure that at least half of the appointment advisory council members for CSAP and have a medical degree, doctoral degree, an advanced degree in nursing, public health, behavioral or social sciences, social work, or are a certified physician assistant, or/and have relevant experience in prevention.

• Requires study and report on formula for SAPT Block Grant.

• Reauthorizes and expands Sober Truth On Preventing Underage Drinking (STOP) Act.
Account for the State Response to the Opioid Abuse Crisis

- **The Opioid Grant provision:**
  - authorizes HHS Secretary to provide grants to states to supplement opioid abuse prevention and treatment activities.
  - establishes a mandatory Treasury account and deposits $500 million in it for each of FY17 and FY18.
    - The Secretary may only withdraw funds that have been appropriated by Congress.
    - For FY17, the entire $500M was included in the CR that runs through April 28.
  - outlines a non-exhaustive list of allowable uses of the opioid grant funds to states.
  - requires states to report the uses for which funds were expended, the activities undertaken, and the ultimate recipients of funding.
  - sunsets the account at the conclusion of FY2026.
Helping Families in Mental Health Crisis Act
Provisions in Cures Act: Re-authorizing and elevating SAMHSA leadership

• **Title 6: Strengthening Leadership and Accountability**

  - Elevates head of SAMHSA to Assistant Secretary for Mental Health and Substance Use
  - Re-authorizes SAMHSA to collaborate with other agencies and stakeholders, with an emphasis on serious mental illness (SMI), homelessness, and veterans
  - Codifies Center for Behavioral Health Statistics and Quality and CMO
  - Lays out overall planning and reporting requirements (Strategic Plan next due 9/30/18 and Biennial Report next due 9/30/20)
  - Updates Center/Office authorizations, National Advisory Council, and Peer Review requirements
  - Tasks Assistant Secretary of Planning and Evaluation with creating evaluation plan for department-wide behavioral health activities
  - Requires GAO study on PAIMI program
  - Creates Inter-Departmental SMI Coordinating Committee (to be established within 90 days of enactment)
Helping Families in Mental Health Crisis Act Provisions in Cures Act: Promoting Evidence-based Practices and Block Grant provisions

- **Title 7: Ensuring Mental and Substance Use Disorder Prevention, Treatment, and Recovery Programs Keep Pace with Science and Technology**
  - Renames Office of Policy, Planning and Innovation, the National Mental Health and Substance Use Policy Laboratory (Policy Lab) and authorizes new innovation grants program at SAMHSA to promote expanding or replicating evidence-based programs.
  - Reauthorizes National Registry of Evidence-based Programs and Practices.
  - Reauthorizes each Programs of Regional and National Significance line at FY16 funding levels.

- **Title 8: Supporting State Behavioral Health Needs**
  - Re-authorizes SAMHSA block grant programs (both SABG and MHBG) at FY16 funding levels and revises some reporting requirements. Allows for negotiated settlements on maintenance of effort penalties.
  - For MHBG, requires the identification of a single state agency to administer the grant and establish goals and objectives.
  - Requires HHS to study block grant distribution formula and report on results.
Helping Families in Mental Health Crisis Act
Provisions in Cures Act:
Re-authorizing SAMHSA Programs

• Title 9: Promoting Access to Mental Health and Substance Use Disorder Care – Individuals and Families
  • Re-authorizes numerous SAMHSA programs at FY16 funding levels:
    • CABHI, Jail Diversion, PBHCI, PATH, Garrett Lee Smith (GLS) State/Tribal and Suicide Prevention TA Center, Mental Health Training and Awareness Grants (aka MHFA), AOT and STOP
    • Certain programs have significant changes to the program such as GLS Campus (reauthorized in later Title) and PBHCI
  • Specifically authorizes Lifeline program (previously funded/conducted using PRNS) and requires the Secretary to maintain the National Treatment Referral Routing Service (currently Helpline/Treatment Locator).
  • Authorizes new programs for: adult suicide prevention, ACT and Crisis Response.
  • Requires the Secretary to disseminate information and provide technical assistance on evidence-based practices for mental illness and substance use disorder in older adults.
Helping Families in Mental Health Crisis Act
Provisions in Cures Act:
Re-authorizing SAMHSA Programs

• **Title 9 - Strengthening the Health Care Workforce**
  • Reauthorizes HRSA Mental and Behavioral Health Education Training Grants.
  • Authorizes a HRSA training demonstration program to award grants for:
    • Medical residents and fellows to practice psychiatry and addiction medicine as well as for NPs, PAs, health service psychologists, and social workers to provide mental health and substance use disorder services in underserved community-based settings; and
    • Establishing, maintaining, or improving academic programs that provide training to improve the ability to recognize, diagnose, and treat mental and substance use disorders.
  • Specifically authorizes MFP.
  • Requires reports on workforce.

• **Title 9 - Mental Health on Campus Improvement**
  • Reauthorizes GLS Campus, but with significant new uses of funds.
  • Establishes an interagency working group on mental health on college campuses
  • Convene groups for public-education campaign to focus on
  • Behavioral health on campuses.
Helping Families in Mental Health Crisis Act Provisions in Cures Act: Strengthening Mental and Substance Use Disorder Care for Women, Children, and Adolescents

- **Title 10: Strengthening Mental and Substance Use Disorder Care for Women, Children, and Adolescents**
  - Reauthorizes and updates CMHI.
  - Authorizes HRSA to provide grants to promote primary and behavioral health care integration in pediatric primary care.
  - Reauthorizes and updates grants for substance use disorder treatment and early intervention for children and adolescents to provide early identification and services.
  - Reauthorizes NCTSI.
  - Establishes new grant program for maternal depression (likely at CDC)
  - Establishes a grant program to develop, maintain, or enhance mental health prevention, intervention, and treatment programs for infants and children at significant risk of developing or showing early signs of mental disorders, including SED, or social or emotional disability.
Other Key Highlights

• **Title 11: Compassionate Communication on HIPAA**
  - Within one year of finalizing rule on 42 CFR Part 2, requires the Secretary to convene relevant stakeholders to determine the effect of the regulation on patient care, health outcomes, and patient privacy.

• **Title 12: Medicaid Mental Health Coverage**
  - Clarifies that Medicaid does not prohibit separate payment for mental health and primary care services provided to an individual on the same day.

• **Title 13: Mental Health Parity**
  - Convene – within six months of enactment – a public meeting to produce an action plan for improved federal and state coordination related to the enforcement of mental health parity and addiction equity requirements.
Opportunities

• Helping states maximize the effectiveness of new investment in funds to address the opioid epidemic.
• Use re-authorization as opportunity to enhance coordination and collaboration across HHS and the Administration.
• Pending appropriations, improve re-authorized programs and successfully launch newly authorized programs such as adult suicide prevention, innovation grants under the Policy Laboratory, and crisis response.
• Enhance evaluation of program effectiveness and sustain focus on promoting evidence-based and evidence-informed practices.

Challenges

• Securing resources for newly authorized programs in FY18.
• Meeting additional reporting and collaboration requirements without accompanying resources.
• Cures Act did not include certain needed changes to truly reform the mental health system and close the treatment gap for individuals with behavioral health conditions.
Questions on the 21st Century Cures Act?

Q&A
Discussion-Changing Landscape of Prevention (Continued)

Facilitated discussion with the NAC and CSAP Leadership
