| - Provide MHC via home visitors, including:  
  - Family-focused consultation and referrals  
  - Child-parent dyad-focused consultation (working to support attachment relationships and provide parenting support)  
  - Child-focused consultation (working to support children with identified social and emotional concerns)  
  - Provide reflective supervision and group consultation  
  - Provide monthly MHC to home visiting supervisors  
  - Offer ECPBIS (Early Childhood Positive Behavioral Interventions and Supports) specialist consultation to home visitors  
  - Offer direct consultation to families and children  
  - Supervise and support mental health consultants | • Define role of mental health consultants with team  
• Hold individual meetings and case consultation with home visitors as requested  
• Coach home visitors as requested  
• Attend monthly home visitor staff meetings; provide general information, feedback, and support  
• Provide tools, materials, and resources to home visitors for use with families  
• Provide referrals to home visitors for community mental health and other services  
• Facilitate discussions and provide hot topics, such as self-care  
• Accompany home visitors to observe home visitor and parent-child interactions  
• Facilitate monthly home visitor group supervision sessions | • Participate in monthly meeting with supervisors  
• Participate in monthly supervisor-consultant meeting (including Community Health Nurse)  
• Discuss specific challenges with families to inform supervision with home visitors  
• Establish and implement referral process for children who score in the Ages and Stages Questionnaire—Social Emotional (ASQ-SE) concern range  
• Adapt ECPBIS materials and trainings for home visiting  
• Provide trainings to home visitors on ECPBIS  
• Attend home visits to observe parents and children  
• Provide coaching and support to parents related to coping, stress management, child development, parenting strategies, and attachment  
• Make referrals to adult mental health services as needed  
• (For mental health consultant) Participate in weekly individual and group supervision sessions and ECPBIS coaches group | Home visitors:  
• Understand how MHC can serve them and families  
• Regularly seek out mental health consultants for input and consultation  
• Have increased confidence, skills, and knowledge about ECMH, best practices, and ECPBIS  
• Are more skilled at coaching parent-child interactions  
• Are more likely to support successful community referrals for mental health issues  
• Understand and use the referral process for children with social and emotional concerns  
• Report increased satisfaction with services through improved quality and responsiveness to specific family needs and challenges  
Supervisors:  
• Have increased confidence, skills, and knowledge to support parents related to coping, stress management, child development, parenting strategies, and attachment  
• Make appropriate referrals more often  
Both home visitors and supervisors:  
• Feel more supported and have less job-related stress | • Improve their interactions with the child  
• Experience less parenting stress  
• Are less depressed  
• Provide a more developmentally appropriate environment for the child  
• Report increased satisfaction with services through improved quality and responsiveness to specific family needs and challenges  
Has a greater likelihood of being linked to Early Intervention for follow-up  
Has increased confidence, skills, and knowledge about ECPBIS in a home visiting context  
Has increased comfort working in a home visiting setting  
Makes appropriate referrals more often | • Has fewer behavioral, social, and emotional issues and concerns  
• Exhibits more positive social behaviors  
• Is linked to more appropriate referrals
