Minority AIDS Initiative Continuum of Care Pilot - Integration of HIV Prevention and Medical Care into Mental Health and Substance Abuse Treatment Programs targeting Racial/Ethnic Minority Populations at High Risk for Behavioral Health Disorders and HIV

Do you want more information or have questions regarding this SAMHSA Grant Announcement? If so, please participate in the following SAMHSA Informational Webinar

DATE & TIME: May 7, 2014 from 2:00 PM - 3:30 PM ET

DURATION: 1 hour and 30 minutes

DESCRIPTION: The purpose of this jointly funded program is to integrate care (behavioral health treatment, prevention, and HIV medical care services) for racial/ethnic minority populations at high risk for behavioral health disorders and high risk for or living with HIV. The grant will fund programs that provide coordinated and integrated services through the co-location of behavioral health treatment and HIV medical care. This program is primarily intended for substance abuse treatment programs and community mental health programs that can co-locate and fully integrate HIV prevention and medical care services within them. However, if it is demonstrated that co-location is not possible and full integration can still be achieved through other means, this will be acceptable. SAMHSA funds must be used for behavioral health screening; primary substance abuse and HIV prevention; substance abuse, mental health, and co-occurring treatment; creation of infrastructure to provide integrated care; HIV and hepatitis screening and testing, and hepatitis vaccination.
